

TAHA GHADHAB

Industrial engineering student · AI, data and industrial process automation

Radès, Tunisia | In France: c/o Ghaddab--Christmann, 14 la Rotonde, 78960 Voisins-le-Bretonneux
tahaghadhab@gmail.com | +216 54 347 150 | linkedin.com/in/taha-ghadhab-5b5835242 | portfolio-taha-ghadhab.vercel.app/fr

Final-year internship (PFE), six months, starting February 2027, counting toward both the engineering degree (ENIB) and the Research Master's (EPT). Internship agreement issued jointly by ENIB and the École Polytechnique de Tunisie. Mobile in France, Europe and Tunisia. Working languages: French and English.

PROFILE

Industrial engineering student at ENIB, on a double degree with the Master's in Intelligent Complex Systems at the École Polytechnique de Tunisie. Profile at the crossroads of industry, AI and process automation. At Safran, I delivered two tools that digitise and automate production checks, validated by 268 tests. I co-founded PharmacoWork, a platform where AI is governed by business rules. I build my tools with AI, then validate them through tests and a security review.

INDUSTRIAL PRODUCTION EXPERIENCE

Methods Engineer, internship · Safran Electronics & Defense June - July 2026

Dhari site, Tunisia | Aeronautical production, regulated environment

- **Digitalisation of a production check:** paper tracking of torque checks across **19 cells** replaced by a traceability application; readings received directly from more than half of the 18 torque meters, tools identified by barcode, out-of-calibration tool blocked, corrections validated by the supervisor; 8 business rules, **58 unit tests**; check time reduced from 60-120 s to 30 s (estimate).
- **AI-based automation of a document process** (OpenCV, PaddleOCR, Tesseract, PyMuPDF): tool for detecting and correcting non-compliant documents, **100% of marks detected on 73 documents, no false positives**, processing time cut from 30-60 min to about 3 min (estimate), **210 unit tests**, operator validation before writing, audit log.
- Daily work with quality, methods and operators; requirements gathering, operator training and writing of work instructions.

Assistant Engineer, internship · SMIP, oil maintenance and installation June - July 2025

Tunis | Industrial equipment

- Technical and economic study of a coiled tubing unit: requirements definition, costing, scenario comparison and recommendation.

Consulting Intern · AFC, Arab Financial Consultants Aug - Sept 2025

Tunis | Consulting

- Data analysis and production of client reporting materials.

PROJECTS

PharmacoWork · multi-tenant workspace for pharmacies 2025 - present

Pilot in pre-production

- Co-founder. 11 modules replacing sticky notes, notebooks and WhatsApp groups; a language model (Mistral API) proposes, business rules verify before any write; about 180 API routes, **63 test suites** in continuous integration, security audit.

ENIB Performance Dashboard · indicator-driven management 2025 - 2026

Used by the school administration

- **42 indicators** tracked, automatic alerts when thresholds are exceeded, consistency checks at every update (Power BI, SQL).

Workshop Layout Decision Support · cell formation 2025 - 2026

Web-deployed application

- Cell formation with King's method followed by chaining optimisation; layouts compared on traffic, connectivity and optimality ratio indicators.

SKILLS

Industrial engineering: Lean and continuous improvement (DMAIC, PDCA, VSM, Ishikawa) · planning (PIC, PDP, MRP) · workshop layout and flow analysis · performance indicators · traceability and non-conformities · work instructions and operator training

AI and data: machine learning · generative AI and language models (Mistral API) · computer vision and OCR (OpenCV, PaddleOCR, Tesseract) · data analysis and reliability · dashboards (Power BI, SQL)

Process automation: digitalisation of paper processes · shop-floor data acquisition · consistency checks and threshold alerts · business rules and human validation · optimisation and operations research

Development and data: Python · C++ · ROS · TypeScript · SQL, PostgreSQL · Docker · MATLAB · Power BI · automated testing and continuous integration · tools built with AI, validated by tests and security audit

Languages: Arabic (native) · French (fluent) · English (fluent, written and spoken) · German B1 (Goethe-Institut)

EDUCATION

Research Master's in Intelligent Complex Systems, double degree 2026 - 2027

École Polytechnique de Tunisie: artificial intelligence, advanced robotics and intelligent transport, embedded systems, optimal control, system identification

National Engineering Degree, industrial engineering 2024 - 2027

École Nationale d'Ingénieurs de Bizerte (ENIB)

Preparatory Cycle in Mathematics and Physics 2021 - 2024

Faculty of Sciences of Tunis. Baccalaureate in Mathematics, with Honours (2021)

STUDENT LIFE

President, AI Innovators club ENIB 2025 - 2026

Led a multidisciplinary team on AI and data projects, ran working meetings and organised events. Previously HR manager of the club (2024 - 2025).
